**Lunar and Planetary Rovers**

The Wheels of Apollo and the Quest for Mars

Series: Space Exploration

- ▶ **First book devoted to concept, engineering and testing of the Lunar Roving Vehicle on Apollo 15, 16 and 17**
- ▶ **Provides extensive quotes from the astronauts who drove the LRV on the Moon taken from interviews conducted especially for the book**
- ▶ **Details new material from interviews of engineers and managers at the Jet Propulsion Laboratory covering the robotic rovers, Sojourner, Spirit and Opportunity**

This book fills a need for a complete history of the Lunar Roving Vehicle used on Apollo 15, 16 and 17, drawing on many photographs never before published. It also tells the story of the robotic rovers used on Mars, and concludes with a description of the new designs of rovers planned for The New Vision for Exploration now underway at NASA.

The author discusses the influence of art and images in both books and magazines that sparked interest in manned space travel. The Cold War launched the Space Race and the Mercury, Gemini and Apollo missions are provided in overview as a prelude to following chapters.

Chapter One explains the early concepts of a lunar rover even before the start of Apollo. Chapter Two details the testing undertaken by the astronauts with the 1-G trainer in desert environments as well as simulators, and at Kennedy Space Center. Chapters Three, Four and Five cover Apollo missions 15, 16 and 17 respectively, with the successful use of the LRV on the moon. Chapter Six describes the engineering of the Martian robotic rovers Sojourner, Spirit and Opportunity. Chapter Seven covers the future use of manned and unmanned rovers in NASA's New Vision.
